1994 WE&T INDEX

Author Index—1994

A

Alberts, Robert
waterfront community expansion 6[2],60
Alexander, M. L.
CSO treatment study 6[9],23
Arabshahi, Seyed Hamid
high ammonia removal rate 6[9],24
Arber, Richard
wetlands constructed for cold weather 6[12],25
Archer, Hugh V.
pollution prevention value 6[6],59
Asdal, Robert K.
pump companies join efficient motor program 6[1],32
Ashmalla, Adel
CSO and stormwater detention tank design 6[12],34

B

Backus, Patricia M.
toxicity reduction evaluation 6[3],57
Baddaker, Jim
collection system requirements 6[9],35
Bailey, Walter F.
solids processing upgrade 6[7],51
Bashaw, Walter G.
plant manages increased biosolids 6[10],31
Batzel, Russell
overflow control protects Mississippi River 6[6],29
Baylinson, Judith E.
environmental crimes report 6[10],25
Bear, Jacob
groundwater models 6[1],54
Beljin, Milovan
groundwater models 6[1],54
Bell, T. M.
tracing metals in the marine food web 6[7],20
Bell, John L.
covers reduce air toxics 6[4],45
Belschner, Dale
screenings dewatering 6[5],21
Benjes, Henry H.
waterfront community expansion 6[2],60
Benware, Anne B.
land-use regulations 6[1],34
Bernstein, Harvey M.
civil engineering community lacks R&D 6[4],38
Berry, Bobby
clarifier eliminates hydraulic overload 6[8],22
Biagi, Delwin A.
L.A. emergency earthquake plan 6[3],23
Biksey, Thomas M.
managing airport watersheds 6[7],42
Biswas, Pratim
biofilters treat contaminated air 6[4],50
Bizzarri, Ronald E.
deep-bed filtration 6[12],48
nitrogen removal plant 6[9],70
Blackmun, Richard
pneumatic solids handling 6[10],18
Boner, Mark
CSO treatment facilities in Atlanta, Ga. 6[1],31
Bowers, Robert
waterfront community expansion 6[2],60
Brenner, Richard C.
biofilters treat contaminated air 6[4],50
Brookhart, Morris
process reduces phosphorus 6[7],17
Brown, Richard A.
site closure technology 6[8],68
Bryant, Chris
EPA's common sense initiative 6[6],10
Burk, Gary
Great Lakes Initiative standards 6[9],58
Burke, Christopher J.
pollution prevention reduces offshore toxicity 6[3],33
Burnam, Jack
tracking toxics from households 6[1],44

C

Cabral, Neal J.
federal multimedia efforts 6[4],29
Callier, Alan J.
enforcing limits 6[2],56
Camastro, Thomas
metals tracking 6[8],60
Campbell, Robert J.
enforcing limits 6[2],56
Cargill, Gregory D.
Chicago's water quality 6[9],52
Carry, Charles W.
L.A. County earthquake repairs 6[3],22
Cassaro, M. A.
hazardous materials management 6[8],48
Chack, John J.
advanced primary treatment 6[1],49
Chandler, Morris
bacterial cultures 6[3],47
Charbeneau, Randall J.
highway runoff study 6[8],37
Charney, Robert D.
demonstration of wetlands treatment 6[2],40
Chattopadhyay, Amit
air emissions from incinerators 6[4],40
Cheng, Mow-Soung
GIS aids in flood management 6[4],34
Christensen, Lyle
liquid waste minimization 6[12],42
Connell, Kevin
Indonesia's environmental market expands 6[4],39
Coulter, Frank
biosolids stabilization technologies 6[4],55
Crites, Ron W.
demonstration of wetlands treatment 6[2],40
Crosse, John
L.A. emergency earthquake plan 6[3],23

D

Daniel, Phillippe A.
nutrient control program 6[9],64
Davis John A.
Portland's new watershed plan 6[2],33
de Steiguer, Allen
nutrient control program 6[9],64
DelConte, M. J.
indirect discharger requirements 6[1],59
DeNicola, Michael
metals tracking 6[8],60
Derr, Henry
trenchless technologies 6[11],50
DiGiano, Francis A.
toxicity reduction evaluation 6[3],57
Dilks, David W.
new procedure for aquatic life criteria 6[3],27
watershed management 6[9],76
Dotterrer, Ilona
attorney communications 6[12],80
Dukes, Glenn W.
watershed management 6[9],76
Duyvejonck, Jon
Upper Mississippi River degradation 6[5],31
Dwyer, Timothy J.
combined sewer overflow policy 6[6],54

E

East, Charles, Jr.
Louisiana's natural cleanup system 6[2],17
Eddington, Gordon
plant increases aeration efficiency 6[1],20
Ehrmann, Larry R
L.A. emergency earthquake plan 6[3],23
Elnawawy, Osman A.
database developed for groundwater models 6[1],19
Engler, John, Gov.
nonpoint source pollution reduction 6[7],10
Epstein, Mark A.
U.S. firms help East German states 6[7],31
Ernst, Mark R.
eutrophication models compared 6[11],16

F

Farvolden, Robert
remediation research funding 6[1],11
Fenimore, Mark F.
infiltration controls 6[3],61
Fenn, Scott
pollution spurs management initiatives 6[3],38
Fisher, William B.
specification ambiguities 6[7],80
FitzPatrick, Brian J.
process increases treatment capacity 6[4],18
Flynn, Kevin C.
watershed management 6[7],36
Foess, Gerald W.
biosolids stabilization technologies 6[4],55
Foisy, Mary Beth
air emissions from incinerators 6[4],40
Ford, Libby
federal multimedia efforts 6[4],29
indirect discharger requirements 6[1],59
pollution elimination principles 6[12],52
Frederick, D. J.
successive wetlands treatment system 6[11],27
Fredericks, Douglas
biosolids stabilization technologies 6[4],55
Freedman, Paul L.
new procedure for aquatic life criteria 6[3],27
watershed management 6[9],76
Fries, Thomas
petitions to clean up New River 6[4],30
Frossard, Woody
eutrophication models compared 6[11],16

G

Gaffoglio, Robert
controlling floating pollution 6[6],38
Gardner, Richard G.
metals in solids processes 6[8],60

Gerbasi, Peter J.
gasoline spill remediation 6[3],40
Gesalman, Claire M.
public participation 6[2],64
Gilmartin, David
sewer rate increases in Massachusetts 6[3],36
Gilson, Michelle Pemberton
highway runoff study 6[8],37
Gjertson, Roy
CSO treatment facilities in Atlanta, Ga. 6[1],31
Glass, Steven
radioactive wastewater 6[8],54
Goldman, Michael L.
wastewater treatment plant improvement 6[2],35
Goldstein, Kenneth J.
land-use regulations 6[1],34
Good, Daniel R.
combined sewer overflow plan 6[6],44
Gover, Nancy
small flows wetlands guidelines 6[2],19
Green, Ben
reed beds polish effluent 6[2],51
Green, Wayne
CSO and stormwater detention tank design 6[12],34
Griffith, Gerrill
federal research data bulletin board 6[1],33
Gross, Robert
environmental policymaking 6[3],9
Grunwald, Lois
plan to improve bay-delta estuary 6[3],35
Guide, Lisa
Bureau of Reclamation reviews water use rules 6[1],28
draft EIS to change Glen Canyon Dam 6[4],27
reforms in federal water policy 6[2],28
Gustav, Richard S.
fish return to Seattle, Wash., stream 6[5],48
Guthrie, Mike
solids drying technology 6[5],56

H

Hadden, Deborah A.
wetlands protection near landfill 6[2],46
Haley, Mark A.
centrifuge considerations 6[10],52
Hall, John C.
EPA amends solids incinerator regulations 6[6],26
watershed credit trading 6[7],58
whole effluent toxicity 6[5],80
Harkness, Gregg E.
composting Disney's solids 6[8],64
Harrison, David S.
high-torque centrifuge comparison 6[3],18
Hartnett, William J.
explosion and fire prevention 6[4],60
Hastings, Jon E.
groundwater legislation 6[1],88
Hatfield Dick
flood-resistant treatment plants 6[4],20
Haug, Roger T.
explosion and fire prevention 6[4],60
high-torque centrifuge comparison 6[3],18
Hauser, Maia
Israel pursues water use strategies 6[6],32
Haworth, Joseph G., Jr.
improving technical presentations 6[2],37
Hegwald, Dan R.
infiltration controls 6[3],61
Heidtke, Thomas M.
helpful zebra mussels 6[11],32
Helm, Richard B.
combined sewer overflow plan 6[6],44
Hemken, Brad E.
high-tech wastewater treatment 6[9],27
Henderson, Michael
winter land application of wastewater 6[12],33
Henke, Blake
deionizing treatment 6[10],20
Hewitt, Gener
combined sewer overflow plan 6[6],44
Hlavinek, Petr
underground treatment plant 6[8],21
Hodges, Rick
Congress responds to wetlands policy 6[1],27
Hofmann, Christian G.
plant updrade eliminates residual chlorine 6[6],20
Holland, J. Kent, Jr.
construction grant appeals 6[10],80
environmental contingencies 6[6],80
Hough, Stephen G.
water reuse program 6[11],34
House, C. H.
successive wetlands treatment system 6[11],27
Howett, Ciannat M.
watershed credit trading 6[7],58

I

Ilijic, Nicholas S.
Hudson River, new plant 6[11],46
Immerso, Thomas A.
wastewater solids management 6[8],43

J

Jager, Ronald A.
New England's composting facilities 6[5],35
Jain, Avinash C.
centrifuge considerations 6[10],52
Jaworski, Larry
Clean Water Act reauthorization 6[10],58
Johnson, Jim
indirect discharger requirements 6[1],59
Johnson, Steven M.
water quality sampling procedures outlined 6[12],31
Jones, Andrew P.
involving the public in water management 6[7],34
Jones, M. C.
hazardous materials management 6[8],48
Jones, Mary Sanna
tracking toxics from households 6[1],44

K

Kaminski, Len
pollution control boats 6[11],16
Karell, Marc
air emissions from incinerators 6[4],40
Kido, Wesley
tracking toxics from households 6[1],44
King, Dennis
wetland mitigation banking 6[2],11
Kinman, Riley
codisposal enhances decomposition 6[9],48
Knight, Robert L.
treatment wetlands database 6[2],31
Kobylinski, Ed
water reuse regulations 6[11],23
Krasnoff, Paul J.
advanced primary treatment 6[1],49
Kreutzberger, William A.
watershed management 6[9],76
Kunihiro, Curtis I.
composting Disney's solids 6[8],64
Kutner, David M.
land-use regulations 6[1],34
Kutz, Don
solids drying technology 6[5],56
Kvasnicka, Kenneth W.
high-torque centrifuge comparison 6[3],18

L

Lang, Mark E.
bank concerned over biosolids use 6[5],33
New England's composting facilities 6[5],35
Lape, Jeffrey L.
combined sewer overflow policy 6[6],54
Leaderman, Arthur I.
Superfund liability reform 6[8],120
LeBeau, Armand
biofilter controls hydrogen sulfide odors 6[3],15
Leete, Jeanette
Minnesota fens are studied 6[1],24
Lekven, Craig C.
wetlands secondary treatment 6[2],40
Leo, William M.
controlling floating pollution 6[6],38
Leppo, Allen
pollution prevention value 6[6],59
Lewis, F. Michael
explosion and fire prevention 6[4],60
Lewis, Richard W.
site closure technology 6[8],68
Li, Ramon
air emissions from incinerators 6[4],40
Licht, Louis A.
poplar trees treat leachate 6[11],19
Liubicich, James
advanced primary treatment 6[1],49
Locke, Edward R.
solids processing upgrade 6[7],51
Lorenz, Wayne
wetlands constructed for cold weather 6[12],25
Lucero, Gene
petitions to clean up New River 6[4],30

M

M'Coy, William S.
centrifuge installation 6[10],52
Macborro, Eric
Portland's new watershed plan 6[2],33
Madison, Mark
poplar trees treat leachate 6[11],19
winter land application of wastewater 6[12],33
Mahaffie, Mike
collection and treatment improvements 6[3],28
Malina, Joseph F., Jr.
highway runoff study 6[8],37
Mancini, John L.
eutrophication models compared 6[11],16
Marston, Kurt R.
wastewater treatment in disguise 6[10],31
Martin, Ron
deep-bed filtration 6[12],48
McCarthy, Peter C.
solids drying technology 6[5],56
McCune, Joyce A.
small flow turf scrubber system 6[12],22
McDonald, Stephen
tracking toxics from households 6[1],44
McFarland, Scott
advanced primary treatment 6[1],49
McGrath, Dorn C., III

EPA construction grants program 6[2],88
environmental justice 6[4],80
McLaughlin, Richard
effects of turf maintenance on water quality 6[7],21
McManus, Terrence J.
high-tech wastewater treatment 6[9],27
McMillan, Suzanna I.
biosolids data management tools 6[5],39
McTigue, William H.
pressure wave technique 6[1],40
Mehrotra, Sandeep
metals tracking 6[8],60
Melbinger, Norman
French plant's use of bacteria 6[7],17
Melcer, H.
toxic pollutant emission 6[3],50
Memoli, Michael A.
gasoline spill remediation 6[3],40
Mentz, Ted
valve coordinates washwater and stormwater flow 6[6],19
Mericas, Dean
airport stormwater management 6[12],36
Mieure, James P.
lab results and surface water studies conflict 6[1],25
Miller, Joseph R.
private firm runs municipal public works 6[8],46
Milligan, Darrell
biofilter controls hydrogen sulfide odors 6[3],15
Monteith, H. D.
toxic pollutant emission 6[3],50
Moshiri, Michael
L.A. County earthquake repairs 6[3],22
Moss, Gerry F.
CSO problems solved 6[5],22
Murphy, David A.
wetlands protection near landfill 6[2],46
Mustokoff, Michael M.
environment crimes report 6[10],25
Myers, Jason
infiltration problem solved 6[6],15

N

Nasr, Sami M.
process increases treatment capacity 6[4],18
Neet, James O., Jr.
environmental compliance audits 6[8],10
Nemetz, Kathleen
French plant's use of bacteria 6[7],17
Newby, Jon P.
water reuse program 6[11],34
Nkuchia, John M.
benefits of reclaimed water 6[4],10

O

Oberst, Rhonda
biosolids data management tools 6[5],39
Osborne, Paul S.
EPA recommends procedures for aquifer pumping tests 6[1],17
Oshinsky, Jerold
timely insurance claims 6[9],240

P

Pace, Anthony K.
risk assessments 6[10],34
Padmanabha, A. "Pad"
solids processing upgrade 6[7],51
Pahlavan, Kamran
collection and treatment system improvements 6[3],28
Parente, Mario
CSO and stormwater detention tank design 6[12],34
Parker, W. J.
toxic pollutant emission 6[3],50
Paulsen, Charles M.
least-cost improvements in Europe 6[9],10
Perciasepe, Robert
EPA's framework for the future 6[2],21
Peterson. W. A.
wastewater treatment privatization 6[11],57
Petino, George
explosion and fire prevention 6[4],60
Petito, John G.
metals tracking 6[8],60
Petrik, Bruce
liquid waste minimization 6[12],42
Phillips, Alan C.
methane recovery benefits 6[4],36
Phillips, Reed
combined sewer overflows reduced 6[10],17
Pickard, David W.
nitrogen removal plant 6[9],70
Pique, G. G.
Mexico wastewater treatment plant 6[8],44
Platt, Fletcher, Jr.
plant overcomes space restrictions 6[9],47
Pollen, Michael R.
President's message 6[10],10
Prescott, Douglas
head tank in force main 6[8],19
Prewitt, James
radioactive wastewater 6[8],54

R

Rafii, Afsaneh
L.A. emergency earthquake plan 6[3],23
Ragade, R. K.
hazardous materials management 6[8],48
Raider, Ronald L.
EPA amends solids incinerator regulations 6[6],26
risk assessment process 6[10],40
Reardon, David J.
improving technical presentations 6[2],37
Reed, Charles C.
composting solids, Walt Disney World 6[8],64
Rhodes, John A.
pressure wave technique 6[1],40
Richardson, Donald A.
pressure wave technique 6[1],40
Richardson, Jean
pneumatic solids handling 6[10],18
Rissetto, Christopher L.
EPA construction grants program 6[2],88
environmental justice 6[4],80
Rittenhouse, Brandi L.
bacterial cultures 6[3],47
Rosenberg, David M.
court's reversed rule limits 6[6],26
environmental professionals certification 6[2],27
Ross, Randall
groundwater models 6[1],54
Rubin, A. R.
successive wetlands treatment system 6[11],27
Rubin, Alan
interview on 503 biosolids regulations 6[5],52
Rubino, Vincent
advanced primary treatment 6[1],49

S

Sack, William A.
small flow turf scrubber system 6[12],22
Scodari, Paul
wetland mitigation banking 6[2],11
Scrivener, Alan
solids drying technology 6[5],56
Selegean, James P.
helpful zebra mussels 6[11],32
Shabman, Leonard
wetland mitigation banking 6[2],11
Shacker, Amy
water reuse regulations 6[11],23
Shaeffer, John R.
wastewater reuse systems 6[8],31
Shrout, Phillip W.
flow equalization solution 6[6],16
Simmons, Charles T.
whole effluent toxicity 6[5],80
Simmons, M. Anne
environmental contingencies 6[6],80
Sinderbrand, Carl A.
construction contract changes 6[3],80
Smith, Doug
public-private partnership 6[7],30
Smith, Francis L.
biofilters treat contaminated air 6[4],50
Smith, Paul J.
biofilters treat contaminated air 6[4],50
Smyser, Fred
pollution prevention value 6[6],59
Solliday, C. William
high-tech wastewater treatment 6[9],27
Sorber, Charles
WEF role in biosolids recycling 6[5],61
Sorial, George
biofilters treat contaminated air 6[4],50
Sovern, Douglas T.
fish return to Seattle, Wash., stream 6[5],48
St. John, John P.
controlling floating pollution 6[6],38
Stafford, James
plant manages increased biosolids 6[10],31
Stevens, Patrick L.
infiltration and inflow studies 6[7],46
Stringfield, Jeffrey
pneumatic solids handling 6[10],18
Stuenkel, William C.
managing airport watersheds 6[7],42
Suidan, Makram T.
biofilters treat contaminated air 6[4],50
Suzuki, Susan J.
covers reduce air toxics 6[4],45
Swanson, Robert R.
water quality sampling 6[12],31
Sweeney, Neal J.
OSHA lead regulations 6[11],80

T

Tafoya, Pete E.
naval testing facility 6[10],29
Taylor, Dave
monitoring U.S. waterways 6[4],25
Tettemer, John M.
water quality–wetlands project 6[4],17
Thorson, Richard
wetlands constructed for cold weather 6[12],25
Tippett, John P.
basinwide nutrient management 6[9],28
Tolbert, Dorian A.
solids processing upgrade 6[7],51
Tomicek, Richard M.
small flow turf scrubber system 6[12],22

V

van de Heijde, Paul K. M.
database developed for groundwater models 6[1],19
Van Dyke, Nancy V. R.
pressure wave technique 6[1],40
Vander Hook, Dennis
L.A. emergency earthquake plan 6[3],23
VanGorden, John D.
infiltration controls 6[3],61
Veil, John A.
making regulatory proposals work 6[7],23
pollution prevention reduces offshore toxicity 6[3],33
Voss, Charles J.
composting Disney's solids 6[8],64

W

Wade, Mark G.
infiltration controls 6[3],61
Wagoner, Bryan
airport stormwater management 6[12],36
Waldrip, Wayne
plant manages increased biosolids 6[10],31
Wallis, Michael J.
covers reduce air toxics 6[4],45
Walter, Rochelle
Superfund costs lost 6[10],26
Wander, John A.
methane recovery benefits 6[4],36
Ward, George H.
highway runoff study 6[8],37
Washington, Percy M.
fish return to Seattle, Wash., stream 6[5],48
Waters, Jeffrey P.
process increases treatment capacity 6[4],18
Webster, Neil A.
methane recovery benefits 6[4],36
WEF Awards Committee
1994 WEF Awards 6[10],46
WEF Biosolids and Residuals Committee
state 503 programs 6[5],46
Wells, Cedar
impervious surface reduction 6[9],41
West, Richard B.
liability insurance for engineers 6[2],28
Wexler, Howard M.
plant upgrade eliminates residual chlorine 6[6],20
Wickham, Jodel
infiltration problem solved 6[6],15
Wildbore, Phil
combined sewer overflow problems solved 6[5],22
Williams, Chuck R.
demonstration of wetlands 6[2],40
Williams, Corey T.
biosolids data management tools 6[5],39
Williams, Tim
watershed management 6[7],36
Wilson, Thomas E.
deep-bed filtration 6[12],48
nitrogen removal plant 6[9],70
Witherspoon, Jay R.
covers reduce air toxics 6[4],45
Wolf, Daniel R.
combined sewer overflows reduced 6[10],17
Wolff, Margaret L.
pollution prevention value 6[6],59
Wong, Debra G.
nutrient control program 6[9],64
Wood, Tom
hydrogeologic conditions study 6[4],33
Wright, Robert R.
water reclamation facility 6[11],40
Wright, William C.
plant increases aeration efficiency 6[1],20

Y

Yano, Gordon
federal water-monitoring technology 6[4],22

Z

Zafer, Michael A.
nutrient control program 6[9],64
Zavistovich, Alex
EPA reports enforcement actions 6[3],28

Subject Index—1994

Air quality
biofilter air treatment 6[4],50
continuous emission monitoring 6[6],37
controlling incinerator emissions 6[4],40

Biosolids
503 regulations, interview 6[5],52
codisposal with solid waste 6[9],48
composting in New England 6[5],35
composting upgrade, Disney World 6[8],64
computer management 6[5],39
drying technology 6[5],56
explosion, fire prevention 6[4],60
land application ban 6[7],22
land application, farm mortgage concerns 6[5],33
management options 6[8],43
pneumatic conveyance 6[10],18
stabilization 6[4],55
state 503 programs 6[5],46
water quality awareness 6[8],40
WEF recycling campaign 6[5],61

Clean Water Act
Clean Water Act reauthorization 6[10],58
illegal dischargers sentenced 6[9],38
management initiatives 6[3],38

Collection systems
diversion system valve 6[6],19
flow equalization solution 6[6],16
foreign improvements 6[9],44
infiltration and inflow studies 6[7],46
maintaining head, air elimination 6[8],19
odor control 6[3],15
Peoria, Ill., combined sewer overflow plan 6[6],44
Pittsburgh, Kans., controls infiltration 6[3],61
tightened design requirements 6[9],35
trenchless technologies 6[11],50

Combined sewer overflows
computer control 6[6],29
controlling floatables, N.Y. 6[6],38
detention tank built 6[12],34
EPA policy 6[6],54
flow equalization 6[6],16
Peoria, Ill., control plan 6[6],44
predicting solids settlement 6[9],23
treatment facilities in Atlanta, Ga. 6[1],31
vortex separation 6[10],17

Education
community relations during expansion 6[2],60
environmental monitor 6[6],23
image improvement 6[2],35
infiltration controls 6[3],61
plant's PR program is reviewed 6[2],35
public involvement 6[7],34
public participation at DOE 6[2],64
tips on improving technical presentations 6[2],37
water quality awareness 6[8],40
WEF awards 6[10],46
WEF biosolids campaign 6[5],61

EPA
chemical release decline 6[7],24
chlorinated chemical waste 6[7],32
combined sewer overflow policy 6[6],54
construction grant appeals 6[10],80
enforcement actions 6[3],28
environmental crime enforcement rates 6[10],25
environmental justice 6[4],80
estuary management 6[3],35
information services 6[7],33
Office of Water, interview 6[2],21
pollutant credit trading 6[7],25
pollution prevention permits 6[3],33
RCRA violations 6[9],36
regulation development 6[7],22
remediation technology database 6[12],32
toxic discharge limits 6[3],27
toxicity reduction evaluation 6[3],57

Groundwater
aquifer pumping test procedures 6[1],17
aquifer recharge 6[11],28
database developed for groundwater models 6[1],19
effects of climate variations 6[9],31
groundwater legislation 6[1],88
land-use regulations 6[1],34
landfill leachate containment ineffective 6[8],34
minimizing impervious surfaces 6[9],41
models predict contaminant fate 6[1],54
monitoring technology marketed 6[4],22
pressure wave evaluation 6[1],40
remediation technology tested 6[7],18
wetlands protection near landfill 6[2],46

Hazardous waste
bacteria measure toxics 6[3],47
contamination prevention 6[6],15
environmental cleanup program 6[10],29
gasoline spill, remediation 6[3],40
hazardous materials management 6[8],48
landfill leachate containment ineffective 6[8],34
liquid waste minimization 6[12],42
public participation at DOE 6[2],64
radioactive wastewater 6[8],54
remediation research funding 6[1],11
site closure technology 6[8],68
Superfund liability reform 6[8],120
tracking toxics from households 6[1],44

Industrial
continuous emission monitoring 6[6],37
foundry saves costs with prevention 6[6],59
gasoline spill, remediation 6[3],40
regional discharge enforcement 6[2],56
regulating indirect dischargers 6[1],59

Instrumentation
computer control of CSOs 6[6],29
diversion system valve 6[6],19

flood management using GIS 6[4],34
treatment database 6[2],31
